 Notice of References Cited by Examir Notice of Art Cited by Applicant, PTO 	,		Application, PTO-152.
5. Information on How to Effect Drawing	Changes, PTO-1474. 6		
Part II SUMMARY OF ACTION			
1. [] Claims 1-/6	<u> </u>		are pending in the application.
Of the above, claims	A	are	withdrawn from consideration.
2. Claims			_have been cancelled.
	·	<u>:</u>	are allowed.
4. Claims			are rejected.
5. Claims			are objected to.
6. Claims 1-16		_are subject to restrict	on or election requirement.
7. This application has been filed with info	rmal drawings under 37 C.F.R. 1.85 which	are acceptable for exam	nination purposes.
8. Tormal drawings are required in respon	se to this Office action.		•
9. The corrected or substitute drawings hat are acceptable; not acceptable (s	ive been received on see explanation or Notice of Draftsman's Pr	. Under 37 atent Drawing Review,	C.F.R. 1.84 these drawings PTO-948).
10. The proposed additional or substitute s examiner; disapproved by the exam	heet(s) of drawings, filed onniner (see explanation).	, has (have) been	approved by the
11. The proposed drawing correction, filed	has been 🔲 ap	proved; disapprove	d (see explanation).
12 Acknowledgement is made of the claim	for priority under 35 U.S.C. 119. The cert al no; filed on;	ified copy has Deen	
13. Since this application apppears to be in accordance with the practice under Ex	condition for allowance except for formal r		to the merits is closed in

EXAMINER'S ACTION

Serial Number: 08/166,925

Art Unit: 1804

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-11 and 16, drawn to expression vectors and a method for making same, classified in Class 435, subclass 320.1.
- II. Claim 12, drawn to an animal infected with an adenovirus vector, classified in Class 800, subclass 2.
- III. Claims 12 and 13, drawn to unicellular hosts transformed with an expression vector, classified in Class 435, subclass 240.2.
- IV. Claims 14 and 15, drawn to a method of producing a protein, classified in Class 435, subclass 69.1.

Claim 12 encompasses two distinct inventions, unicellular hosts and multicellular animal hosts. Should either of groups II or III be elected, claim 12 will be examined to the extent that it encompasses the elected subject matter.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the vector of I can be used for gene therapy or vaccination.

Inventions I and each of II and III are related as mutually exclusive species in intermediate-final product relationship. Distinctness is proven for claims in this relationship if the intermediate product is useful to make other than the final product (M.P.E.P. § 806.04(b), 3rd paragraph), and the species are patentably distinct (M.P.E.P. § 806.04(h)).

Serial Number: 08/166,925

Art Unit: 1804

In the instant case, the intermediate product is deemed to be for production of two different final products, the multicellular animals of II and the unicellular hosts of III, and the inventions are deemed patentably distinct since there is nothing on this record to show them to be obvious variants. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions anticipated by the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Groups II and III are distinct because they are drawn to two materially different products having different properties and utilities. The animals of II can be used for production of meat, fur or other products, production of antibodies, etc. The cells of III may be used for production of proteins or production of adenovirus particles. Furthermore, different methods are required to produce the animals of II and the cells of III.

Groups II and IV are distinct because the animals of II are not required for the method of IV and the method of IV is not required to produce the animals of II.

Inventions III and IV are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (M.P.E.P. § 806.05(h)). In the instant case the process of IV, protein production, can be carried out with other commercially available vectors. Alternatively, proteins may also be synthesized chemically or isolated from natural sources.

Serial Number: 08/166,925

Art Unit: 1804

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bruce Campell, whose telephone number is 703-308-4205. The examiner can normally be reached on Monday-Thursday from 8:30 to 5:00 (Eastern time). The examiner can also be reached on alternate Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jacqueline Stone, can be reached on 703-308-3153. The FAX phone number for art unit 1804 is 703-308-4312.

An inquiry of a general nature or relating to the status of the application should be directed to the group receptionist whose telephone number is 703-308-0196.
